**Job Title:** Operations Manager

**Location:** 5555XC, Valkenswaard, The Netherlands

**Company:** Dutch Medical Devices B.V.

**About Us:**

Dutch Medical Devices B.V. [DMD] is a leading innovator in the field of point of care and wearable medical devices, dedicated to improving patient outcomes through cutting-edge technology and exceptional quality. We are seeking a highly skilled and motivated Operations Manager to join our team and play a key role in our continued growth and success.

**Job Summary:**

As the Operations Manager at Dutch Medical Devices, you will be responsible for overseeing and optimizing all aspects of our manufacturing and supply chain operations. You will work closely with cross-functional teams to ensure the efficient production and delivery of high-quality medical devices, while maintaining compliance with regulatory standards and driving continuous improvement initiatives.

**Key Responsibilities:**

1. **Production Management:**
  - Supervise and lead the production team to meet production targets, quality standards, and delivery schedules.
  - Monitor and optimize production processes to improve efficiency, reduce waste, and enhance product quality.
  - Ensure compliance with all relevant quality and regulatory standards, including ISO13485 requirements.
2. **Supply Chain Management:**
  - Manage and optimize the supply chain, including procurement, inventory control, and distribution.
  - Develop and maintain relationships with suppliers to ensure a reliable and cost-effective supply of raw materials and components.
  - Implement inventory management strategies to minimize carrying costs while ensuring product availability.
3. **Team Leadership:**
  - Recruit, train, and mentor a high-performing operations team.
  - Foster a culture of teamwork, accountability, and continuous improvement within the department.
  - Set clear performance objectives and conduct regular performance evaluations.
4. **Process Improvement:**
  - Identify opportunities for process optimization and cost reduction.
  - Lead and participate in continuous improvement initiatives.
  - Implement best practices and efficient workflows to enhance overall operations.
5. **Regulatory Compliance:**
  - Ensure that all operations adhere to relevant regulatory and quality standards, including CE & FDA regulations and ISO standards.
  - Collaborate with the Quality Assurance team to maintain and improve the company's quality management system.

**Qualifications:**

- Bachelor's degree in Operations Management, Engineering, or a related field (Master's degree preferred).
- Minimum of 5 years of experience in operations management, preferably in the medical device industry.
- Strong knowledge of quality management systems, regulatory requirements, and Lean manufacturing principles.
- Excellent leadership, communication, and problem-solving skills.
- Ability to work collaboratively in a cross-functional team environment.
- Fluent in Dutch is a pre.

**Benefits:**

- Competitive salary.
- Pension retirement plan with employer match.
- Opportunities for professional development and career advancement.
- A positive and collaborative work environment focused on innovation and excellence.

**How to Apply:**

Interested candidates are invited to submit their resume and a cover letter detailing their relevant experience to [lauwerijssen@2mel.nl](mailto:lauwerijssen@2mel.nl)  
Dutch Medical Devices is an equal opportunity employer and values diversity in our workforce.
